Professional Experiences (10 yr)

Designer / Marketer / B developer at Digikala (Digital Gold) (2.5 yr - Full Time)

Duties: In this role, I defined the product vision, features, and growth strategy for Digikala's Digital Gold, leading end-to-end execution from product design to marketing. My duties included designing and running major campaigns (zero-fee, installment, and gift card), creating user segmentation models based on assets, demographics, and behavior, and building automated marketing flows with event-driven engagement. I also developed BI dashboards to monitor NMV, CTR, CPC, and conversion rates, while coordinating PR, performance marketing, and tech teams to ensure alignment.

Achievements: My achievements included boosting user acquisition and engagement through data-driven initiatives, expanding brand awareness via strategic PR coverage, improving campaign efficiency by replacing spreadsheets with structured dashboards, and introducing new financial service concepts such as BNPL and gold-backed credit.

Product designer at Carsparency & Khodro45 (2.5 yr - Full Time)

Duties: Gathering data and lighting on pain points, Creating a design prototype, and testing ideas to improve Selling conversion, Design an whole Car buys & Sell Platform for UAE Sellers & Buyers.

Achievements: Make user flow efficient and increase site conversion with usability test and validate prototypes.

Marketing at Hadish Mall (1 yr - Part Time)

Duties: Joined as a marketer to increase mall traffic through event planning, social media campaigns, and influencer collaborations. Proposed and designed a concept for a mall management application to improve tenant-customer engagement.

Achievements: Boosted visitor turnout by driving awareness via online/offline campaigns and influencer partnerships. Expanded business vision beyond marketing by initiating the idea of a digital management app, positioning the mall for long-term growth

Product Manager at Fibona (2 yr - Part Time)

Duties: Conducted in-depth stakeholder interviews to analyze business status and identify needs. Designed and implemented business strategies including brand positioning, tagline creation aligned with identity, and website development based on analysis of traditional business processes.

Achievements: Delivered a coherent brand identity and digital presence, enabling the business to modernize operations and align stakeholders around a unified growth strategy.

Product Manager & designer at OTeacher (1 yr - Part Time)

Duties: Platform redesign with a focus on teacher-student matchmaking. Conducted research with both educators and learners to identify key friction points, and translated findings into a clear product roadmap. Led design sprints to prototype and validate solutions before implementation.

Achievements: Delivered a more intuitive matching experience, increasing engagement between teachers and students. Strengthened differentiation in the EdTech space by aligning platform features with user needs and educational workflows.

Product designer at Arvan Cloud (2 yr - Full Time)

Duties: Led a comprehensive redesign of the cloud platform, focusing on both UI/UX and information architecture. Applied data-driven methods by analyzing user behavior to identify which server metrics were most valuable to present. Collaborated with engineering teams to understand technical performance and with product teams to translate insights into an accessible, user-centered dashboard.

Achievements: Improved clarity and usability of the cloud platform by surfacing the right information for users, resulting in measurable NPS growth over time based on defined satisfaction metrics.

Product Manager & designer at Biomaze (3 yr - Part Time)

Duties: Design Website & Education Panel & Empower Developers with design system for Fast Developpe.

Achievements: Helping business to achieve their goals to become the first player in the official education system more than any player in the Industry.

UI/UX designer at Didestan (8 mos - Full Time)

Duties: Design Video platform based on data (data-driven with analytics), design mid-fidelity prototype for development with google material & research based on lean UX.

UI/UX designer at AIParadise (1.2 yr - Full Time)

Duties: Design Gamified microgames, design call app for Desktop & design WiFon call app for B2C.
